Winter Birding

Presented by
Brandon Burger, Backyard Bird Shop

Ever wonder what happens to birds in the winter? Learn which species remain and what we can do to make it easier for them and more enjoyable for us. As the days grow shorter and the temperatures drop, many species of birds migrate south to warmer and richer climates; but not all. Certain Sparrows, Finches, and even a Hummingbird choose to stay and brave the freezing months with us. Winter also invites others into our yards. Ways to keep nectar feeders from freezing solid, how to provide drinkable water on an icy morning, types of nutrition and energy we can offer, what we can do to provide shelter from harsh winds and cold rains will be among the topics we discuss.

**Class Location: CASEE Center, Building B, Room 205
11104 NE 149th Street, Brush Prairie, WA. 98606**

Day/Time: Saturday November 18, 2017 10:00 am-noon

**Fees: Naturescaping members free or \$15.00 for non-members.
Membership per year is \$20.00 (\$15.00) for seniors.**

**Register for classes or for more information:
