10:00 a.m. to 12:00 p.m.

Composting Methods & Options

Presented by

Pete DuBois, Master Composter Recycler Program

Confused by composting? Don't know if it is something you can do? Get a comprehensive overview of some of the many composting methods and options. Understand what composting is and does, and the differences between the types; vermicomposting (worms), backyard composting (fungi, bacteria, invertebrates), bokashi (essential microorganisms EM), Hugelkultur (rotting wood). Find one or more ways to incorporate composting / organic waste reduction into your life.

Practical as well as inspirational and educational information to get to zero organics in the garbage.
